Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 52-77, drawn to methods of diagnosing prostate cancer, classified in class 435, subclass 6.
- II. Claims 78-103, drawn to methods of diagnosing breast cancer, classified in class 435, subclass 6.
- III. Claims 104-106, drawn to a diagnostic test for confirming prostate or breast cancer, classified in class 436, subclass 283.1.
- IV. Claim 107, drawn to a method of detecting agents causing genomic destabilization, classified in class 514, subclass 1.
- V. Claims 108-112, drawn to methods of correlating allele miscoordination in cells with cancer-causing or anti-cancer properties of compounds, classified in class 514, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

A) Inventions III and (I,II) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1637

process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in materially different processes, such as the methods of I and II.

B) Inventions III and (IV,V) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together; the product of III is not useful in the methods of (IV,V).

C) Inventions I, II, IV, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different functions; these are various methods with different steps and parameters. For example, invention I requires diagnosis of prostate cancer; II requires diagnosis of breast cancer; IV requires detection of genomic destabilization; and V requires screening for allele miscoordination or inhibition thereof.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or because the search required for any one of Groups I-V is not required for any other Group, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth R Horlick whose telephone number is 703-308-3905. The examiner can normally be reached on Monday-Thursday 6:30AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703-308-1119. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
